PROFESSIONAL SUMMARY

Passionate Computer Science undergraduate with strong expertise in full-stack development, AI/ML, and cloud technologies. Experienced in building scalable web applications and implementing machine learning solutions.

EDUCATION

Indian Institute of Information Technology - Sri City, Chittoor

CGPA: 8.6/10

B.Tech in Computer Science and Engineering (2023 – 2027)

EXPERIENCE

Full Stack Developer

Cogzin Technologies

November 2025 – Present

- Lead developer of **MuktiFresh** - Hyperlocal quick delivery e-commerce platform based in Bengal region. Improved performance, scalability, and maintainability.
- Modernized legacy website using updated tech stack and industry best practices.
- **Migrated backend** from PHP + SQL to Node.js (Express) + MongoDB with redesigned schema, significantly reducing query latency. Redesigned, optimized & refactored the React frontend.

POSITIONS OF RESPONSIBILITY

Domain Lead, AI/ML & Data Science

Google Developer Group (GDG)

2025 – 2026

- Proposed scalable solutions for complex Deep Learning and NLP challenges solving problems with high accuracy
- Collaborated with 10+ team members to organize and deliver workshops on AI technologies

SKILLS

Languages: C/C++, Python, Java, JavaScript, TypeScript, SQL

Full-Stack & Frameworks: Next.js, React.js, Node.js, Express, Redux, GraphQL, Tailwind CSS, HTML, MongoDB

AI/ML & Research: Machine Learning, Deep Learning, TensorFlow, NumPy, Pandas, Scikit-learn

Cloud & DevOps: AWS, Google Cloud, Docker, Git, GitHub, Linux

PROJECTS

Youtube - Mate — *Next.js, Express, MongoDB, Typescript, Tailwind CSS, yt-dlp, WebSockets*

- Architected & built a full-stack YouTube management platform with features like Multi-participant synced **Group streaming**, and **Collaborative Playlist** manager for synchronous curation and streamlined **Audio, Video & Playlist downloads**.
- Implemented AI-powered **Transcription & Summary** Generator, precise timestamped **URL Shortener**.
- Built secure authentication using **Google OAuth 2.0** and subscription billing with **Stripe**.

Milestone - Freelancing Website — *Socket.io, React, Redux, Node.js, MongoDB, GraphQL*

- Developed a **multi-role** freelancing platform delivering role-based access, **real-time chat**, notifications.
- Engineered **end-to-end hiring workflows** including job posting, applicant management, **milestone-based payments**, enabling users to find opportunities within seconds

AI-Driven Agricultural Assistant — *AlexNet, CNN, Streamlit, FastAPI, Python, OCR*

- Created an AI tool to **boost crop productivity**, serving 50+ farmers in pilot testing
- Integrated image-based **crop and pest disease detection** and **soil nutrient analysis** with 90% accuracy

SQL Injection prevention in Cloud Environments — *AWS [SNS, RDS, Lambda, WAF, Cognito], React, SQL*

- Built & Deployed website on AWS, using multiple AWS services & Security layers
- SQL parsing, Twofish encryption to ensure **detection & protection** against 90%+ types of SQLi Attacks

CERTIFICATIONS

Machine Learning Specialization – Stanford Online & DeepLearning.AI – [Link](#)
